p. 85-92.

DESCRIPTORS: *Germicides, *Antibiotics, *Urinary
system, Infections, Therapy, Sulfonamides.

Urinary infections of varying severity and origin occur
often and require a logical course of therapy, viz.
treatment of the symptoms or complications of the in-
fection as well as that directed at the etiology (e. g.,
extraction of a calculus, extirpation of a tumor, pros-
tatectomy), without which there could be no hope for
recovery. (Author)
